DANISH PATENT AND TRADEMARK OFFICE

Most Danish companies trade with foreigners

Trading partners in trading with patents (%)

Data: Questionnaire 2006.

Note: Data only cover patentholder's trade with patents.

Experiences from IP audit

- Potential for improvement – even among the most skilled companies
- Companies know that knowledge is important, but not all are using IP
- Companies often think of knowledge as an asset that can be used internally. More seldom as an asset to other companies.
- Knowledge development is not considered as a business areas in itself.
- Better at buying knowledge than commercializing own.
- Management is hard to influence – particularly in relation to sales or outbound licensing

OM I GLEDER TIL AKTIVITET

Er der styr på videnværdierne i din virksomhed?
Tjener din virksomhed nok på sin viden?

Test din virksomhed og få en gratis rapport!

Hvad er formålet med testen?

Testen viser, om din virksomhed har styr på de processer, der skaber virksomhedens videnværdier. Er der styr på udviklingen af ny viden? Passer virksomheden på den nye viden eller smutter den ud til konkurrenterne? Får virksomheden resultater på bundlinjen baseret på ny viden? osv.

Testen ser på, om din virksomhed arbejder med strategier, processer og ansvarsfordeling i forhold til videnværdierne. Selve indholdet af strategierne, processerne etc. vurderes dog ikke.

Hvad er udbyttet?

Du får en indikation af, om virksomheden styringsmæssigt er på rette vej, eller om der skal en mere fokuseret indsats til for at få bedre styr på at udvikle og udnytte videnværdierne bedre - og dermed få bedre resultat på bundlinjen.

Testen tager kun 10 - 12 minutter at gennemføre. Baseret på dine svar genererer "IP Response" en rapport med konklusion og uddybende forklaring. Denne rapport kan du downloade og udskrive. Dermed får du inspiration til brug for virksomhedens videre arbejde.
